

VEHICLE DYNAMICS INTERNATIONAL

Vehicle Dynamics International 2016

The International Review of Next-Generation Automotive Suspension, Steering, Braking and Dynamics Electronics Technologies and Trends

Vehicle Dynamics International Technology magazine, is the world's only international review of next-generation automotive suspension, steering, braking, chassis simulation and testing, and vehicle dynamics electronics and technologies. The magazine is published twice a year and sent to 10,000 senior vehicle dynamicists and programme chiefs.

"As a technology company providing advanced software solutions to major automotive clients, choosing VDI enabled us to reach a very broad audience of skilled product designers and engineers, as well as quickly generate qualified new leads"
- Altair

Topic areas covered in Vehicle Dynamics International magazine include:

- Electronic retardation systems and developments
- Next-generation brake friction materials and designs
- Fully integrated electronic dynamic control devices
- Isolation and control systems and solutions: beyond rubber damping
- Advanced electronic and hydro-electronic driveline and transmission concepts
 - Corner-engineering systems
- Intelligent tires for enhanced road-manners and secondary ride control
 - Electromagnetic dampers and beyond
 - Lightweight axle and spring materials
 - Cutting-edge power steering technologies
- Next-generation dynamics software simulation systems
- Future kinetic rig designs and measurement solutions
 - Advanced hydraulic system design

Publishing schedule:

Vehicle Dynamics International is published twice a year:

May: **Automotive Testing Expo Stuttgart Show Issue**
November: **Annual Showcase Issue**

Sponsorship of the Carrier Sheet

Cost per issue 1 side: **£4,350**

Cost per issue 2 sides: **£5,650**

App banner rates: £7,500 for 1 year

Advertising:

Full or half-page advertisements

Full-page £4,450

Half-page £3,650

DPS and cover opportunities subject to availability.
