AAMGARD MOTORSPORT SERVICE

Stand: 3050

Stand Representatives: Michael Bauermeister

Address: Grabenstrasse 212, Duisburg, D-47057, Germany

Tel: +49 2033 175645

Email: michael.bauermeister@aamgard.de

Web: www.aamgard.de

Reliable electrical systems are major keys to success in racing. Aamgard Motorsport Service develops and builds electrics and electronics for race car and testbed applications. The product range includes: wiring looms, FIA rain lights and race car lighting systems, as well as lightweight dashboards, steering wheels, electronic fuse boxes and special-application control units. High-quality electronic signal boards, pitlane equipment and precision sensors complete the range. Aamgard Motorsport Service stands for high-grade engineering at reasonable prices, with absolute adherence to deadlines. On-site service and custom engineering are provided for national and international race teams, engine and car builders.

ABSOLUTE CASING

Stand: 5058

Address: Unit 1 Apple Pie Farm, Aldworth Road, Compton, RG20 6RD, Berkshire, UK

ACL DISTRIBUTION INC

Stand: 8044

Stand Representatives: Juan Bez, Mark Shadbolt, Tim Vehlwald

Address: 4722 Danvers Drive SE, Kentwood, MI 49512, USA

Tel: +1 305 903 0011

Email: jbez@aclus.com

Web: www.aclperformance.com.au/us/indexus.html

ACL Race Series performance engine bearings are recognised as a premier brand throughout the motorsport world. Race Series rod and main

bearings are standard components in race engines that have set records and won championships from Mexico to Bonneville – from sport compact drift racing to small block Nascar, IHRA and NHRA competitions. The unique combination of design, metallurgy and engineering provides Race Series performance bearings with the endurance and capability needed to perform where others cannot. These exceptional bearings are available for a variety of American, Asian and European performance engines.

ACS AUSTRALIAN CLUTCH SERVICES

Stand: 8018

Stand Representatives: Shemek Wisniewski, Piotr Zakrzewski, Monika Gozdan, Joanna Przybylska

Address: 1 Hakkinen Road, Wingfield, 5013, South Australia, Australia

Tel: +61 883 0050 00

Fax: +61 883 0050 50

Email: sales@xtremecutch.com.au

Web: www.australianclutch.com.au

Xtreme Clutch is a division of Australian Clutch Services, the clutch and flywheel specialist. Xtreme Clutch has been at the forefront of performance clutch technology for decades. Its in-house testing machinery and close bonds with motorsport have allowed the company to do extensive testing on various combinations of materials and disc designs. With over 2,200 performance clutch kits in single and multi-plate formats, Xtreme can cater for the needs of high-horsepower street, drag, drift and race applications. Also available are ultra-light, high-performance flywheels in aluminium, chrome-moly and billet-steel for many vehicle makes and models.

AEM PERFORMANCE ELECTRONIC

Stand: 8034

Stand Representatives: Kirk Miller

Address: 2205 W 126th St, Unit A, Hawthorne, 90250, CA, USA

Tel: +1 310 4842 322

Email: kmiller@aempower.com

Web: www.aemelectronics.com

AEM Performance Electronics designs and manufactures programmable engine management systems (EFI/ ECU), wideband UEGO air/fuel controllers, water/methanol injection systems, boost controllers, high-flow fuel pumps, high-flow fuel filters, adjustable fuel pressure regulators, performance display gauges, datalogging systems, high-output ignition coils and ignition solution products. The company's vision is to provide innovative, leading-edge technology at a competitive price, and therefore available for more racers, and to discover unique solutions that improve vehicle performance. It will achieve this through unparalleled product integrity, being a price/value leader and putting customers first. Its products are engineered to outperform.

AERO TEC LABORATORIES (ATL) LTD

Stand: 5064

Stand Representatives: Toby Jenkins, Ranald Harding, James Gornall, Giles Dawson

Address: ATL Technology Centre, Denbigh Road, Bletchley, MK1 1DF, Milton Keynes, UK

Tel: +44 1908 351 700

Fax: +44 1908 351 750

Email: sales@atlltd.com

Web: www.atlltd.com

ATL designs and manufactures composite bladder devices and fluid transfer systems for race cars, aircraft, spacecraft, defence vehicles, submersibles, marine craft and industry. Its fuel cells are crash resistant, explosion suppressant and extremely lightweight, thereby offering performance gains alongside major safety improvements. The company has been the sole supplier of fuel cells to all F1 teams for two decades, and to the DTM, BTCC and Super GT now, too. ATL also supplies the majority

of GT, LMP1/2/3, WRC and WTCC cars racing today. Furthermore, ATL sells a wide variety of standard fuel cells and components for all levels of motorsport.

AIRCONCEPT GMBH

Stand: 5052

Stand Representatives: Heinrich Viethen
Address: Krefelder Str. 4, Zuelpich, D-53909, Germany

Tel: +49 2252 8380 180

Fax: +49 2252 8380 181

Email: h.viethen@airconcept-enterprises.com

Web: www.airconcept-enterprises.com

Airconcept designs, generates and produces innovative highly sophisticated lightweight structures, concept ideas, prototyping, tools and moulds, optimum solutions in different circumstances, engineering for the automotive and aviation industry, based on CAD-data systems; supported by different CAM-strategies, in-house five-axis CNC machining centre (up to 6,000 x 3,000 x 1,200mm cuboid); all tools/moulds made in-house using CRP/GRP/aluminium. It also offers production of components for sports and racing cars (certified by TÜV Germany), parts made from CRP/GRP and metal. Airconcept's production systems are RTM, autoclave and infusion technology.

ALONS-AUTOSPORT

Stand: 8002

Stand Representatives: Guido Alons, Tanja Alons

Address: Roomweg 101, Grashoek, 5985 NS, Netherlands

Tel: +31 493 5390 08

Fax: +31 847 3912 89

Email: office@alons-autosport.nl

Alons Autosport specialises in motorsport electronics, selling DTA engine motor-management systems through the Benelux countries and Germany, Austria and Switzerland. DTA systems are state-of-the-art competition systems offering an unmatched combination of performance and affordability, together with very user-friendly software. It also sells Jenvey fuel injection throttle bodies and induction systems for motorsport at all levels and high-performance vehicles of all types. Alons Autosport supplies custom-made cable looms, sensors, injectors and other parts.

ANGLO AMERICAN OIL COMPANY

Stand: 3039

Stand Representatives: Anders Hildebrand, Eva Hildebrand

Address: 58 Holton Road, Holton Heath Trading Park, Poole, BH16 6LT, Dorset, UK

Tel: +44 1929 551 557

Fax: +44 1929 551 567

Email: Hannah@aaoil.co.uk

Web: www.aaoil.co.uk

Anglo American Oil Company, now in its 16th year in business, is the official European and Middle Eastern distributor for Sunoco and 'R' racing fuels, as well as stocking Driven Racing Oil, Tuff jugs, PJ1 Track Bite and ISC racers tape. Sunoco is the largest racing fuel manufacturer in the world, and Anglo American Oil Company supplies its fuel to over 20 championships in the UK and Europe. Combined with its bespoke blending facilities, Anglo American Oil Company offers top-quality service to race series, teams and individuals, and delivers direct to customers in the UK.

AP RACING

Stand: 5012

Stand Representatives: Joe Bennett, Bill Condon, Ian Nash, Jon Simpson

Address: Seven Stars Industrial Estate, Wheler Road, Coventry, CV3 4LB, UK

Tel: +44 2476 883 348

Fax: +44 2476 439 559

Email: sales@apracings.com

Web: www.apracings.com

AP Racing is a world leader in the design and manufacture of brake and clutch systems for motorsport, OEM, performance road and special vehicle applications. The current product range includes the very latest Radi-CAL Pro 5000 R options, plus four, six and eight-piston Radi-CAL calliper variants, brake discs, master cylinders, pedal boxes, brake pads, factory big brake kits and air jacks. The clutch range features the 2015 championship-winning Formula 1 Clutch, part of AP Racing's state-of-the-art carbon/carbon range, together with the company's latest 'I' drive clutches, available in sintered or cerametallic paddle options for race and rally.

ARCASTING SRL

Stand: 8030

Stand Representatives: Nadir Giacometti, Antonio Giacometti, Elena Andretta

Address: Via Monte Santo 41, Riese Pio X, 31039, TV, Italy

Tel: +39 042 3755 306

Email: n.giacometti@arcasting.it

Web: www.arcasting.it

Arcasting is an Italian company that produces alloy rims for leading OEMs. Although it remains committed to OEMs, Arcasting has also developed a full range of wheels. Its production system uses low-pressure casting technology, and its wheels are 100% made in Italy. The company's range includes wheels for a range of uses (car line, SUV line, light truck line, heavy-duty, competitions and so on). The two different lines for racing are 4x4 – from 16 inches to 17 inches – and rally – from 14 inches to 18 inches. Both are made with special alloy (Al Si7), heat treatment, steel inserts, special paint cycle, for excellent wear resistance.

ARE DRY SUMP SYSTEMS

Stand: 4020

Address: 2890 Lopes Lane, Loomis, 95650, CA, USA

Tel: +1 916 652 5282

Fax: +1 916 652 6041

Email: gary@drysump.com

ARE Dry Sump Systems introduces a new line of Dry Sump Oil tanks to add to its fabricated tanks. These are Aerospace aluminum alloy A356 T6 4axis CNC machined tops and bottoms, incorporating all potential AN O ring ports for scavenge returns, venting, Spintrix, oil fill, temp sender and heater bungs already there. Any unused ports are plugged with Viton O ring aluminum plugs. Another great feature is that these tanks can be ordered in any height (capacity) to suit all race cars. Internally the company uses high G force capable baffling, and they can be completely split for cleaning. Visit ARE / Spintrix at PMW Stand 4020 for more information. You can also go to www.drysump.com or call 916-652-5282.

ARP - AUTOMOTIVE RACING PRODUCTS

Stand: 5018

Stand Representatives: Chris Brown, Nigel Atkinson

Address: 1760 Lemonwood Dr, Santa Paula, CA 93060, USA

Tel: +1 805 525 1497

Fax: +1 805 525 1441

Email: info@arpfasteners.com

Web: www.arp-bolts.com

ARP has over 47 years' experience in manufacturing threaded fasteners for use in the motorsport, aerospace, oil and gas industries. The company manufactures bolts, studs and nuts in a wide range of high-strength materials, for racing teams and engine manufacturers around the world. All of its manufacturing processes are performed in its own ISO9001- and AS9100-certified plants in California, USA, using state-of-the-art machinery, including forging, heat treatment, machining, centreless grinding, thread rolling, finishing and testing. In addition to offering bespoke fasteners, ARP has a range of over 4,500 stock part numbers. The company has a worldwide distribution network as well as a UK-based European office.

ARROW PRECISION ENGINEERING

Stand: 4018

Stand Representatives: Ian Arnold, James Williams

Address: 12 Barleyfield, Hinckley Fields Industrial Estate, Hinckley, LE10 1YE, Leicestershire, UK

Tel: +44 1455 234 200

Fax: +44 1455 233 545

Email: ros.arnold@arrowprecision.com

Web: www.arrowprecision.com

Arrow Precision is a world leader in the design and manufacture of connecting rods and crankshafts. The company offers a vast range of custom-designed and direct replacement engine components for competition, high-performance, prototype and OE engines. Its customer base spans all areas of motorsport, including Nascar, WRC, Moto GP and Le Mans. Its quality is equalled only by its level of service, whether customers require a single rod or high-volume production. Arrow Precision has many popular engine types in stock, available by clicking on its website or by contacting the company directly. It is an authorised distributor and stockist of ARP fasteners.

ASK KUGELLAGERFABRIK ARTUR SEYFERT GMBH

Stand: 2028

Stand Representatives: Josip Jurkovic, Bruno Morin, Axel Seyfert

Address: Weillimdorfer Str 32-36, Korntal-Muenchingen, D-70825, Germany

Tel: +49 711 830 800

Fax: +49 711 8300 8500

Email: ask@askubal.de

Web: www.askubal.de

Since 1958 ASK Kugellagerfabrik has offered quality bearing products under the trademarks Askubal, Askurol and ASK. This family-owned company is internationally active, with business relationships throughout the world. It has already supplied well-known manufacturers of sports cars, race cars, racing motorbikes and karts with rod ends, spherical bearings and customised solutions, build-in chassis, front and rear axles and suspensions in metric and inch size. Its 70 years of experience in manufacturing, R&D and DIN EN ISO 9001-certificated quality management guarantee consistently high quality in every part of the company.

ASNU CORPORATION EUROPE LTD

Stand: 7064

Stand Representatives: Simon Moy Thomas, Bernd Prickartz

Address: 65-67 Glencoe Road, Bushey, WD23 3DP, Herts, UK

Tel: +44 208 420 44 94

Email: marketing@asnu.com

Web: www.asnu.com

ASNU will display its award-winning range of high-performance fuel injectors, specifically designed for performance, tuning and racing applications. These injectors are now recognised as the most comprehensive range available anywhere in the world. The injectors come complete with all the injector characterisation data now required by performance engine tuners to allow them to map the system correctly. ASNU will also be demonstrating its ASNU classic GDI injector testing and servicing system, which now can offer testing and servicing on PIEZO GDI injectors as well as solenoid GDI injectors.

ATEC AUTOTECHNIC LIMITED

Stand: 2040

Stand Representatives: Kieron Griffiths

Address: Unit 3 Topstation Road, Brackley, NN13 7UG, Northants, UK

Tel: +44 1280 704 525

Fax: +44 1280 704 181

Email: kieron@atecautotechnic.com

With offices in Germany and the UK, ATEC Autotechnic is a leading manufacturer in the hose and fittings market. The company carries extensive stocks of standard parts, and produces in-house bespoke components and assemblies, to tight deadlines, for a range of customers with exacting standards. ATEC pursues constant product development, working at the highest levels within motorsport and specialist markets, ensuring an innovative approach to any installation. ATEC is also a stockist of Symetric dry break couplings and a supplier of leading motorsport brands including Staubli, Bosch, Adel Wiggins, Stratoflex, Setrab and Mocal.

AUBERT & DUVAL

Stand: 2022

Stand Representatives: Graham Franklin

Address: Tour Maine Montparnasse, 33 Avenue Du Maine, Paris Cedex 15, F-75755, France

Tel: +33 1 45 3838 88

Fax: +33 1 45 3838 60

Email: graham.franklin@eramet-aubertduval.com

Web: www.aubertduval.com

Aubert & Duval is a key innovative supplier for the motorsport industry (Formula 1, WRC, Indycar and MotoGP). It offers a wide range of metallurgical solutions with a dedicated service allowing it to meet the extreme requirements of mechanical engineering in motorsports. Aubert & Duval has the capability to design, melt and manufacture special steels, superalloys, aluminium and titanium alloys as bars, forgings, sheets and powder metallurgy. Aubert & Duval's production capacity, combined with team expertise, a worldwide sales network and commitment to innovation, quality and service, enable the company to work alongside the most demanding industries.

AUTO VERDI

Stand: 4050

Stand Representatives: Stefan Verdi, Udo Finck

Address: Box 125, Smedjebacken, SE 77791, Sweden

Tel: +46 240 59 43 00

Fax: +46 240 59 43 01

Email: info@autoverdi.com

Auto Verdi is a leading company in the development of con rods and dry sump pumps. Its prime market is in the USA, including Nascar racing teams.

AUTOTEL DIGITAL RACE RADIO

Stand: 3040

Stand Representatives: Sarah Mower, Richard Palmer, Peter James

Address: Unit M Loddon Industrial Estate, Loddon, NR14 6JD, Norfolk, UK

Tel: +44 1508 528 839

Fax: +44 1508 528 499

Email: sarah@autotel.co.uk

Web: www.autotel.co.uk

Autotel Digital offers a complete range of radio communications equipment for motorsports, from entry level to full team systems used in top-level motorsport applications. The company specialises in digital systems that offer many benefits when used in this environment, and prides itself on offering high build quality, cutting-edge technology and value for money to its many customers. Of special interest this year to its export customers is the new NX9001 system. This very cost-effective full digital system offers the same high-quality digital communication as the company's main systems, with a full expansion path to a larger team system. The system is aimed at end users and dealers in Europe and throughout the world.

AXAUTO-PARTS

Stand: 2042

Stand Representatives: Mélanie Castel

Address: 85 Rue D'Alsace, Epinal, F-88000, France

Tel: +33 9 62 51 99 80

Fax: +33 3 29 33 77 54

Email: contact.frdeveloppement@gmail.com

Web: www.axauto-parts.com

Axauto-Parts' first and most important work is developing and manufacturing race parts. Specialised in brakes disks, cooling and exhaust

systems, it can develop parts starting from an existing (but no longer produced) model or a customised piece. From silicon hoses kits to aluminium radiators, aluminium intercoolers, brake disks (GrN or drilled-grooved) and stainless-steel exhaust systems, the company has an extensive catalogue of racing parts.

BACCI ROMANO TRASMISSIONI

Stand: 6014

Stand Representatives: Andrea Bacci, Giulio Dialti

Address: Via Caravaggio, 61, Tavarnelle Val Di Pesa, I-50028, Firenze, Italy

Tel: +39 055 8071 561

Fax: +39 055 8071 284

Email: info@baccioromano.com

Web: www.baccioromano.com

Bacci Romano Company has been making products for racing car transmissions for decades. Its attention is focused on the competitions in which GT, rally, prototype and formula cars take part. Founded in 1933, the company attributes its good reputation within the racing world to its top-quality products and extensive range. Bacci Romano's products range from sequential gearboxes, close-ratio synchromesh and dog engagement gear kits, to short final drive ratios and limited-slip differentials for the most popular modern and vintage car models. The company can also produce special components on request, along with parts for vintage car restoration.

BASE PERFORMANCE SIMULATORS LTD

Stand: 6068

Stand Representatives: Ella Barrington, Martyn Hoyer

Address: Manor Park, Warkworth, Banbury, OX17 2AG, Oxfordshire, UK

Tel: +44 1295 276 611

Email: info@baseperformance.net

Web: baseperformance.net

Base Performance Simulators (BPS) provides simulator packages tailored to the needs of any driver, from its base near Banbury, 20 minutes from Silverstone, UK. BPS was created by double Le Mans-winning Aston Martin works driver, Darren Turner. With 12 years of experience in developing cutting-edge Formula 1 simulators, Darren has a unique insight into the science of racing simulation.

A former winner and subsequent judge of the McLaren Autosport BRDC Young Driver of the Year Award, he knows what is important when it comes to driver training and development. BPS has two specialist simulators on-site for hire – the BPS4.8 single seater, now with full motion, and the BPS GT simulator – alongside manufacturing bespoke simulator systems for teams and individuals around the world. The BPS facility can also be used for unique corporate and private events.

BBS MOTORSPORT GMBH

Stand: 6006

Stand Representatives: Erich Gissler

Address: Im Mühlegrün 10, Haslach IK, D-77716, Germany

Tel: +49 783 2960 95-0

Fax: +49 783 2960 9527

Email: info@bbs-motorsport-gmbh.com

Web: www.bbs.com

BBS Motorsport wheels are clearly in the lead, delivering great performances and giving partners a crucial advantage. How does BBS Motorsport do this? The company lives for motorsport and applies itself with passion, decades of experience, concentrated expertise and the latest production technology, for the benefit of its partners. Fully forged or in multiple parts, made of aluminium or magnesium, its products are technical masterpieces in perfect aerodynamics, with minimal weight and maximum stiffness – predestined for a place on the podium!

BF1SYSTEMS

Stand: 4004

Stand Representatives: James Shingleton, Ben Gale, Carol Calver

Address: Technical Centre, Owen Road, Diss, IP22 4ER, Norfolk, UK

Tel: +44 1379 646 216

Fax: +44 1379 770 026

Email: james.shingleton@bf1systems.com

bf1systems is a market-leading provider of electrical, electronic and composite solutions to clients in the motorsport, automotive, aerospace and sports markets, including those racing in F1, IndyCar, GTE/GT3, Nascar, touring cars and Le Mans. bf1systems will display a selection of composite steering wheels, ranging from an F1 wheel to a GT race car wheel, and its complete range of tyre pressure and temperature monitoring systems for use on car and in the garage. It will also showcase a variety of force measurement components for suspension

equipment from some of the most popular suspension manufacturers, plus wiring harnesses, ranging from an F1 chassis harness to smaller harnesses integrated into composite components.

BIORICS NV

Stand: 3056

Stand Representatives: Joachim Taelman, Ann Goeman

Address: Technologielaan 3, Heverlee, 3001, Belgium

Tel: +32 163 958 54

Email: joachim.taelman@biorics.com

Web: www.biorics.com

In racing, the optimal readiness of the driver during the race is the key to success. BioRICS, in cooperation with the race team GetSpeed, has developed cutting-edge technology to monitor the mental state of the driver. The system analyses body parameters measured on the driver and indicates in real time if the driver is in the optimal performance zone. This product, called Driver's Performance @ Racing, is based on scientific evidence. It is a basic tool for every professional racing team and driver eager to improve.

BOSCH ENGINEERING GMBH

Stand: 5034

Stand Representatives: Sven Behrens

Address: Robert Bosch Allee 1, Abstatt, 74232, Germany

Tel: +49 7062 / 91179101

Email: motorsport@bosch.com

Web: www.bosch-motorsport.de

Bosch Motorsport develops and manufactures systems and components for use in motorsport. The Bosch specialists deliver the company's products to complete racing series and individual teams. For the DTM series, for example, Bosch has exclusively supplied the engine control unit and the dashboard unit. Bosch is also the sole supplier of electrical and electronic components for Formula 3. The WRC champion 2013 was equipped by Bosch Motorsport with the engine control unit and several other parts. Moreover, many teams competing in the Le Mans 24-hour race and numerous other races rely on Bosch Motorsport systems and components.

BREMBO SPA

Stand: 7004

Stand Representatives: Gianluca Zonca, Luca Battistella

Address: Via Brembo 25, Curno - BG, I-24035, Italy

Tel: +39 035 605 1111

Fax: +39 035 605 2766

Email: info@bremsentechnik.de

Web: www.pagidracing.com

As a member of the TMD Friction Group, BT Bremsen Technik is a leading international manufacturer of racing and high-performance brake products. Pagid racing brake pads are designed to produce the highest possible performance levels over a wide range of operating conditions, and are available in many different material formulations. They fit most popular racing and high-performance

callipers, and may also be fitted as an upgrade to many standard callipers for high-performance cars. In addition, Pagid racing brake pads are fitted as original equipment to some of the most prestigious and powerful production cars in the world, including Audi, Bugatti, Ferrari and Porsche. Besides the well-known Pagid racing brake pads, BT Bremsen Technik offers further high-performance brake-related products, such as race brake discs and brake fluid.

BTN TURBO LTD

Stand: 8034

Stand Representatives: Paul Kang, Nick Burford

Address: BTN House, Unit 2 Zodiac Park, High Road, Cowley, UB8 2GU, Uxbridge, UK

Tel: +44 1895 425 290

Email: paulk@btnperformance.com

Web: www.btnperformance.com

Whether you want more turbo power for track days or drifting, BTN Performance has everything you need. The BTN Performance range features the best quality components, designed to deliver dependable power under tough operating conditions. From the performance turbo to all the individual parts needed to fabricate your ultimate turbo system, BTN Performance is your one-stop shop. BTN Performance is part of the BTN Group, the largest independent turbocharger distributor in the world.

CAE SHIFTING TECHNOLOGY

Stand: 5027

Address: Leimkugelstrasse 3 - D-45141 Essen, Germany

Tel: +49 201 877 7802

Sequential transmissions are not yet the standard by far, and they don't really make sense to adapt on synchronised transmissions. The compromise solutions for a sparing changing of the gears that delivered in series by automotive manufacturers are not especially suited for high-level motor sports. Focussing on motorsports, it is possible for almost all vehicles to attain significant improvements. The company continuously implements its experience on new vehicles, it provides six to eight new shifters every year and at the moment it provides more than 100 Applications for around 20 car manufacturers.

CAPRICORN AUTOMOTIVE GMBH

Stand: 5024

Stand Representatives: Giorgio Wild, Silke Römer, Jens Nothelle

Address: Speditionstrasse 23, Düsseldorf, D-40221, Germany

Tel: +49 211 3015 480

Fax: +49 211 3015 4815

Email: g.wild@capricorngroup.de

Web: www.capricorngroup.de

Capricorn lives and breathes motorsport. Every single one of its business areas has evolved from these roots and developed over the years. Individually customised products of the best possible quality in a very short time span – this is the level of service Capricorn is committed to providing. The motivation to solely use the best options – any time and any place – guarantees extraordinary quality. And that's what wows Capricorn's clients – all of them from the motorsport elite, the OEM automotive and processing industry. Capricorn has been successfully delivering its made-in-Europe products to the world of motorsport for decades – including FIA Formula 1 World Championship, FIA World Endurance Championship, FIA World Rally Championship, FIA World Touring Car Championship, Rally Dakar, Nascar, GP2 Series, GP3 Series, MotoGP, Moto2, Moto3, to name but a few.

CARTEK AUTOMOTIVE ELECTRONICS LTD

Stand: 5026

Stand Representatives: Neil Armstrong, Declan Armstrong

Address: Unit 25, Mitchell Point, Ensign Way, Hamble, Southampton, SO31 4RF, UK

Tel: +44 2380 457 747

Email: info@cartekmotorsport.com

Web: www.CARTEKMOTORSPORT.com

Cartek Automotive Electronics is a UK-based electronics company that has been manufacturing and supplying equipment to the motorsport industry for more than 10 years. It is most famous for its electronic battery isolators, which are used in every area of motorsport, from international GT racing and global rallycross, to club-level racing and rallying. Cartek's range of innovative motorsport products includes FIA rain lights, wireless steering wheel controls, shift lights, coolant level sensors, power distribution modules and power control panels.

CARTESY GMBH

Stand: 7056

Stand Representatives: Holger Strohmaier

Address: Am Industriepark 11, Mühlendorf A. Inn, D-84453, Germany

Tel: +49 8631 1869 50

Email: holger.strohmaier@cartesy.de

Web: www.cartesy.de

Cartesy will showcase its new intelligent racing wheel scales. The scales benefit from the following features and attributes: ultra flat, only 20mm high, full anodised aluminium housing, up to six intelligent sensors, spirit level, radio transmission up to 40m, integrated display, and high accuracy 0.1% FS. The scales also boast a range of 700 to 5,000kg, have many radio display options, big LCD, hand terminal, PC with MS Excel, portable thermal printer, auto zero tracking and temperature compensation, rechargeable battery for 40 hours, no need for ramps, direct drive-on, very low sensitivity to side forces, and IP 67 protection.

CASELINER S.R.O.

Stand: 5028

Stand Representatives: David Solnický, Robert Lucak, Jana Skybova

Address: Nad Jezerem 568, Vestec, 252 42, Prague - West, Czech Republic

Tel: +420 244 463 151

Email: lucak@caseliner.eu

Web: www.caseliner.eu

Caseliner offers a wide range of equipment, including various tyre transport trolleys, air bottles, flight case transport boxes and pitlane stands for the team management; in other words, the place where the overall racing strategy is decided. The company's portfolio includes LED timing boards, shaped aluminium partitions and the latest composite panel walls, called seamless walling. These walls are supplied with aluminium trussing – gantries, modular flooring systems, canopies and various types of lighting systems. Caseliner's products are manufactured according to the regulations of FIA, ACO or USCC. This includes a complete refuelling rig and other pit stop equipment, including air-handling equipment and Dino Paoli tools. The full product list is on the company's website.

CB SPECIAL COMPONENTS

Stand: 4044

Stand Representatives: Claudio Bertot, Michele Bertot, Silvio Carenini

Address: Via De Nicola 40, Forno Canavese (TO), I-10084, Italy

Tel: +39 012 4779 19

Fax: +39 012 4779 19

Email: info@cbspecialcomponents.com

Web: www.cbspecialcomponents.com

CB Special Components (CBSC) provides mechanical parts for the motorsport world using the knowledge gained over years of fieldwork. The company has developed relationships with drivers and engineers, working for WTCC and WRC mainly in terms of suspension and transmission racing components. CBSC offers a wide range of products developed in the factory and also available by customer request. It specialises in interacting with customers to develop their projects, both small and large scale. For testing and prototyping, CBSC will provide a studied product featuring excellent quality and performance, and high-spec materials, all within short timeframes. Its knowledge and equipment allow CBSC to satisfy the needs of the motorsport world.

CES EUROPE LTD

Stand: 2006

Stand Representatives: Tony Giles

Address: Unit 2 Penhill Industrial Park, Beaumont Road, Banbury, OX16 1RW, Oxfordshire, UK

Tel: +44 1295 279 558

Fax: +44 1295 275 161

Email: sales@ceseuropeltd.co.uk

Web: www.ceseuropeltd.co.uk

CES Europe will show the full Paoli range of wheel guns, as well as some working models. Also on show will be its latest working innovative pit stop wheel gun. This was designed and manufactured from a project by a university graduate, as the ultimate in ease of use for faster, easier and more consistent pit stops for all race series. The company will also have on show a range of full-wrap carbon cylinders 330bar rated. All of this coupled with its knowledge of all things air-driven, from high flow regulators to full refuelling rig design and garage equipment setups, makes Stand 2006 worth a visit.

CINEL FORGED WHEELS

Stand: 4038

Stand Representatives: Leonardo Cinel, Stefano Tartagliani

Address: Via Barco 90/A, Altivole, I-31030, (Treviso), Italy

Tel: +39 0423 569 173

Email: leonardo.cinel@cinelforgedwheels.com

Web: www.cinelforgedwheels.com

Cinel Forged Wheels is an Italian company founded in 2011 based on 20 years' experience with the major wheels manufacturers. It has produced forged wheels, size 17" up to 23", for motorsports, streetcars and prototypes. It supplies the best drivers and team in FIA world championship rally cross. Cinel Forged Wheels' internal production works according to ISO 9001 standards; thanks to the company's passion, technology and high-level customisation, its products are exclusive.

CLARENDON

Stand: 3026

Address: Newtown Grange Business Park, Desford Road, Newton Unthank, LE9 9FL, Leicestershire, UK

Tel: +44 1455 828 201

Fax: +44 1455 828 521

Email: paul@clarendoneng.co.uk

Clarendon will be exhibiting with Speciality Fastener and Components (SFC) at this year's Expo. Clarendon is bringing the Livelock 3334 Series of lightweight fasteners to this year's show, along with new products developed with SFC including Aeroloc, Hydraflow and Aerocatch. Clarendon's portfolio is enhanced with the SFC AeroCatch range of panel fasteners including the AeroCatch Xtreme specifically designed for high strength applications. Also of interest to motorsport customers will be the Hydraflow 14J21 Flexible Fluid Coupling with unique safety strap feature for oil, water and air applications and new to market the Aeroloc 1/4 Turn Fastener, a robust, long lasting answer to the problem of secure panel fastening. Specialty Fasteners' broad range of products, includes bespoke items designed and manufactured in house.

CMP MOTORPISTON

Stand: 8030

Stand Representatives: Ivan Camera

Address: Via Antiche Mura N. 34, Sant'Ambrogio Di Torino, 10057, Torino, Italy

Tel: +39 011 9323 263

Fax: +39 011 9323 681

Email: motorpiston@motorpiston.it

Web: www.motorpiston.it

From high-quality forged pistons onwards, CMP Motorpiston realises projects right up to finishing and completion of packaging with pin and ring series. Beginning with the customers' requirements, and thanks to its own experience in the development of driving shaft and flywheels, the company can offer reliable and strongly performing products. The company's experience in valves also allows it to offer reliable products derived from a VRX anti-magnetic material.

CON-SEPT GMBH

Stand: 6054

Stand Representatives: Ralph Geraets

Address: Alarichstr 1, Köln, D-50679, Germany

Tel: +49 151 1765 2778

Email: r.geraets@con-sept.com

Web: www.con-sept.com

Con-Sept has many years of experience in the development of high-end valve components, and offers hollow and solid valves made of steel and titanium. Having shown its hollow-head valves at last year's expo, Con-Sept will now showcase its second-generation improved hollow-head valves, with smaller wall thicknesses, higher tolerances and improved materials. The increased hollow area improves the cooling and reduces the weight, to optimise the performance of the engine.

COSWORTH

Stand: 6016

Stand Representatives: Robert Kirk, Robert Jarvis, Russell Towlson, Christian Harris

Address: Cosworth Ltd, The Octagon, St James Mill Road, NN5 5RA, Northampton, UK

Tel: +44 1604 598 803

Email: marketing@cosworth.com

Web: www.cosworth.com

Cosworth employs its motorsport-inspired engineering and manufacturing capabilities to improve vehicle and driver performance. The group supplies electronics and powertrain products and engineering services to high-performance vehicle manufacturers, motorsport teams and performance

enthusiasts around the world. With headquarters in Northampton, UK, the group has a globally recognised brand and employs staff across Europe and the USA.

CREASEY CASTINGS LTD

Stand: 7006

Stand Representatives: Chris Powley, Shaun Creasey

Address: Unit 6 Eurolink Way, Sittingbourne, ME10 3RN, Kent, UK

Tel: +44 1795 431 242

Email: sales@creasey-castings.co.uk

Creasey Castings manufactures high-specification precision sand castings, both in aluminium and magnesium alloys. Its in-house facilities include spectrograph analysis, tensile testing, Brinell hardness testing, ultraviolet penetrant flaw detection, heat treatment, shot blasting with both alumina oxide and glass bead, and chromate finish of magnesium castings. It also undertakes the welding of aluminium and magnesium castings. The company supplies to a wide variety of customers, from Formula 1, Indy Car and World Rally Car, through to Historic and Clubman racing with critical engine components and auxiliary parts, gearbox and suspension housings, wheels and steering components.

CREVENTIC BV - 24HSERIES.COM

Stand: C410

Stand Representatives: Helen Roukens, Daphne Gengler, Gerrie Willems, Ole Dörleman, Natasha Mark

Address: Zandstraat 11, Gennep, 6591 DA, Netherlands

Tel: +31 485 471 166

Fax: +31 485 471 127

Email: roukens@creventic.com

Web: www.24hseries.com

Dutch agency, Creventic, is the promoter of the 24h Series, an FIA-approved international endurance series of 12- and 24-hour endurance race events at fascinating circuits all over the world, aimed at amateurs and gentleman drivers, semi-professionals and professional drivers. A wide variety of 'tin top' touring cars, GTs and 24h specials (such as silhouette cars) are eligible to race, from 'hot hatchbacks' up to proper GT3 machinery and purpose-built race cars. Current events include the Hankook 24h Dubai, the Hankook 12h Italy-Mugello, the Hankook 24h Silverstone, the Hankook

12h Zandvoort, the Hankook 24h Circuit Paul Ricard, the 24h Barcelona and the Hankook 12h Epilog Brno.

CRUDEN BV

Stand: 6050

Stand Representatives: Martijn de Mooij, Frank Kalff, Edwin de Vries

Address: Pedro De Medinalaan 25, Amsterdam, 1086XP, Netherlands

Tel: +31 20 707 4668

Fax: +31 20 707 4669

Email: m.driehuis@cruden.com

Web: www.cruden.com

Cruden works with many top race teams, including Formula 1, and motorsport engineering companies around the world. It produces simulators for race car engineering, vehicle development and driver familiarisation. Its six degrees of freedom (6-DOF), driver and hardware in the loop, motion-based simulators are trusted for their realism and accuracy, and relied on to deliver unlimited testing in less time and for less money. The company also supplies simulator components and simulator software, and undertakes car modelling and track modelling to order. Cruden is responsible for its own professional image generation.

CUSTOM CAGES LTD

Web: www.drexler-motorsport.de

Drexler Motorsport represents innovative motorsport technology in the range of driveline technology for racing cars and exclusive sports cars. Limited-slip differentials and driveline components by Drexler are used in numerous racing series, by professional and amateur racing teams. Drexler Motorsport's product range is used in everything from Formula 3, WTCC and truck racing to series-production vehicles. Every differential can be equipped with customised setups and adjustable characteristic diagrams. Other products from Drexler include tripod driveshaft systems, wheel hubs, brake disc hubs, clutch shafts and gears. Drexler also produces Formula 3, group N rally as well as sports and touring car gearboxes.

DULLINGER FAHRWERKSTECHNIK

Stand: 1014

Stand Representatives: Günther Dullinger, Birgit Dullinger

Address: Kasten 3, Vichtenstein, 4091, Austria

Tel: +43 676 685 0371

Email: office@dullinger.co.at

Web: www.dullinger.co.at

Dullinger Fahrwerkstechnik is a leading service provider for racing suspension and support for professional racing teams. Its main focus is the service and improvement of racing suspension.

This covers everything from the repair and checking of shock absorbers up to new construction of dampers and suspension parts. It also checks shock absorbers, springs and anti-roll bars, as well as working on the optimisation of chassis systems and kinematics. Suspensions are designed and adapted individually according to customers' requirements. The company is well known for high-quality standards and fast processing. Its customers range from WTCC, GT3 and rally sports up to private racers in hillclimb racing or VLN. Besides the technical work, Dullinger Fahrwerkstechnik offers tolerance control, damper logistics and spare part logistics for professional customers.

DUXE RACE RAMPS EUROPE

Stand: 3038

Stand Representatives: Stephanie Beerens

Address: Molenzijde 55, Merksplas, B-2330, Belgium

Tel: +32 485 684 911

Email: info@duxe.be

The vehicle wheel ramp has taken a big step forward with the launch of Race Ramps, a portable vehicle-lifting system constructed from the latest lightweight materials. The system starts with solid foam ramps in a range of sizes, heights and inclines, and builds into a complete modular lifting and display system. Race Ramps are practically indestructible because of their unique construction; they will not slide across a garage floor, dig into an asphalt driveway, or scratch painted or wooden floors. They can be used on grass, sand or almost any other flat surface. The lightweight structure makes them easy to store and manoeuvre, but still capable of lifting a 2.2-ton vehicle up to 35cm off the ground. Affordable, lightweight, anti-skid, strong and low-profile are the keywords to describe Race Ramps, from simple ramps to vehicle display.

DYNOJET RESEARCH

Stand: 8048

Stand Representatives: Carl Chastain

Address: 2191 Mendenhall Drive, Suite 105, North Las Vegas, 89081, NV, USA

Tel: +1 702 673 4010

Web: www.dynojet.com

Dynojet Research is the world leader in the development and manufacture of performance enhancement products and tools. Its fuel management and diagnostic products, coupled with its personalised services, give customers the resources to maximise performance and increase

efficiency. With over a decade of experience, Dynojet relies on state-of-the-art technology to provide customers with the best products available. The company's philosophy is based on the belief that its customers are number one. Individualised attention is given so that they can take full advantage of the products the company offers. Because of this philosophy, Dynojet guarantees high credibility, consistency and customer satisfaction. Put its products to the test.

ELITE RACING TRANSMISSIONS

Gp-Race Equipment has designed and manufactured FIA-approved racing seats since 2006. It uses the latest fiberglass technology available, in order to offer the lightest and strongest fiberglass seats on the market at a very competitive price. Gp-Race Equipment also offers a wide range of quality harnesses, steering wheels, and fire extinguishers, as well as other motorsport accessories. This year, it will present the lightest FIA-approved fiberglass racing seat ever made, thanks to innovative vacuum moulding technology. Gp-Race Equipment's ambition is to become a leading supplier of motorsport accessories in the next few years. It is looking for motivated independent distributors worldwide.

GRAINGER & WORRALL LTD

Stand: 5006

Stand Representatives: James Grainger, Philip Ward, Alex Grainger, Matthias Schoeffmann

Address: Stanmore Ind Estate, Bridgnorth, WV16 5LW, Shropshire, UK

Tel: +44 1746 768 250

Fax: +44 1746 768 251

Email: egrainger@gwcast.co.uk

Grainger & Worrall (G&W), the world's leading total castings solutions provider, will showcase its wide range of casting skills, validation and associated engineering services at Professional MotorSport World Expo 2015. The MIA Motorsport Company of the Year award winner is at the forefront of innovation in motorsport casting, with long-standing experience across Formula 1, Nascar, MotoGP, WRC and GP2. It offers world-class excellence in structural casting, machining, engineering and rapid prototyping, with a focus on defect-free casting, downsizing and structural weight reduction with increased performance. Using the latest manufacturing techniques, such as 3D printing, G&W continues to push engineering boundaries.

GRAND DESIGN SYSTEMS LTD

Stand: 5058

Stand Representatives: Alistair Fray

Address: Unit 6, Boundary Road, Buckingham Road Industrial Estate, Brackley, NN13 7ES, UK

Tel: +44 1280 702 510

Fax: +44 1280 705 225

Email: alistair@granddesignsystems.co.uk

Web: www.granddesignsystems.co.uk

Grand Design Systems of Brackley, England, is world renowned for its Maxi Pit Box Walling Systems – considered to be the very best on the market. At this year's expo, for the first time, GDS will show its new Midi System seamless walling, designed to be a very inexpensive seamless panel that replaces the cumbersome pole and panel magnetic walling that teams have had to use up until now. With hardly any difference in cost, the new one-piece panel makes magnetic walling a thing of the past.

GRATZ ENGINEERING GMBH

Stand: 4047

Stand Representatives: Andreas Steinbronn, Heiko Imholz, Siegfried Luhmann

Address: Linsenberg Str 9, Weinsberg, D-74189, Germany

Tel: +49 7134 198 99 21

Fax: +49 7134 989 949

Email: madeleine.mayer@gratz.de

Web: www.gratz.de

Gratz, a knowledge-based company with over 250 employees, offers engineering competence along the entire process chain. Over 30 years of development know-how, innovative thinking and a high degree of customer orientation are key to the scope of its performance. Its main objective at all times is to give its customers long-term satisfaction. As an independent family-run business, Gratz thinks and acts in a sustainable manner – for its employees, its customers and in its dealings with suppliers. Economic continuity is its watchword. Customer orientation means working in close cooperation with its customers to develop tailor-made solutions. Thorough knowledge of requirements and objectives lets the company realise complete solutions for the automotive sector, mechanical engineering, machine building and general engineering industries.

GROOT TECHNIEK/ CHASSISPARTS

Stand: 2016

Stand Representatives: Ronald Groot

Web: www.hb-bearings.com

HB Bearings has manufactured quality bearings for motorsport since 1972. It is proud to be associated with major race teams and transmission manufacturers both in the UK and worldwide. HB works closely with its customers on bearing design and development in this very demanding environment. As well as manufacturing bespoke bearings for current race teams, it manufactures for the classic motorsport, motorcycle and historic racing car sectors. It can reverse engineer bearings from drawings, references and samples. HB Bearings has a talented team of bearing designers, ready to assist you.

HELIX AUTOSPORT

Stand: 7042

Stand Representatives: Oliver Prentice, Ian Matthews, Lewis Harmer, Terry Ormerod, Tilman Sandtler

Address: Unit 1G Vantage Business Park, Bloxham Road, Banbury, OX16 9UX, Oxon, UK

Tel: +44 1295 701 076

Fax: +44 1295 709 617

Email: sales@helix-autosport.com

Web: www.helix-autosport.com

Helix Autosport was established in 1992 and is now a leading supplier of handmade competition clutches, based in the UK with distributors around the globe. Helix Autosport clutches and flywheels have become market leaders for their reliability and performance, both on and off the race circuit. The company's technical department has more than 45 years' experience in the manufacture and design of clutch systems. Its expertise, along with its flexible production facilities, enables Helix Autosport to provide a prototype and bespoke clutch service to suit most applications. Its products are supplied to most European countries and have proved successful, winning many prestigious endurance race and rally events around the world. Helix Autosport is proud of the fact that it designs, machines, assembles and tests all of its clutches and flywheel kits in house.

HJS EMISSION TECHNOLOGY GMBH & CO KG

Stand: 1014

Stand Representatives: Klaus Osterhaus, Sven Kampmann, Ina Schmoll

Address: Dieselweg 12, Menden/Sauerland, 58706, Germany

Tel: +49 2373 987 0

Fax: +49 2373 987 169

Email: motorsport@hjs.com

Web: www.hjs-motorsport.de

HJS Emission Technology is a medium-sized family-owned company with a successful 38-year history. HJS has made a name for itself with the development and production of emission aftertreatment systems such as catalytic converters and diesel particulate filters. It has been engaged in the development, production and marketing of HJS catalyst and exhaust systems for the motorsport sector since 1990. Its customers – amateur sportsmen, work teams, and everyone from the hobby tuner up to the vehicle manufacturers – know HJS as a highly competitive and service-orientated company. Innovative technologies and products, customer satisfaction and long-lasting business relations are the foundation for its future. At the same time, HJS is making an important contribution to protecting humans and the environment.

HOLINGER EUROPE

Stand: 7040

Web: www.kingracebearings.com

King Engine Bearings, a leading manufacturer of cutting-edge bearings since 1960, developed the King Racing line to improve engine bearing performance under extreme conditions. King Racing utilises innovative research and development processes and rigorous lab tests, as well as on-track trials conducted by top racers. The King Racing line combines sport compact and domestic race engine bearings with groundbreaking geometric and metallurgical features.

KRATZER AUTOMATION AG

Stand: 7052

Stand Representatives: Achim Ewenz

Address: Gutenbergstr 5, Unterschleissheim, 85716, Germany

Tel: +49 893 2152 521

Fax: +49 893 2152 599

Email: testsystems@kratzer-automation.com

Web: www.kratzer-automation.com

Kratzer Automation provides highly efficient testing solutions for automotive research and development and racing applications. Testbeds are tailor-made for required application and designed for testing of engines, gearboxes, powertrain, turbochargers, batteries and drives for electrical and hybrid vehicles. The PATools TX automation system makes testing more efficient thanks to functions such as the ability to change test objects and parameters during test runs, as well as through the use of graphical programming and integrated test data management. testXplorer is a web-based test management system, which provides corporate-wide filing and retrieval of test data. In addition, it coordinates all test-field activities and resources. As a general contractor, the company designs and builds new test systems, as well as offering the possibility to modernise existing test systems of several manufacturers.

KRONENBURG MANAGEMENT SYSTEMS

Stand: 6022

Stand Representatives: John van Kronenburg, Johan van Grootel, Dirk van Tulden, John Merkelbach

Address: Spaarpot Oost 19, Geldrop, 5667 KT, Netherlands

Tel: +31 402 802 629

Lazer Lamps will present its range of Triple-R elite and standard ultra-long-range LED lights for the motorsport market, along with unique mounting innovation solutions. The Triple-R lights feature optional magnesium components for weight reduction, combined with charged air cooling systems to maximise light output. Lazer is proud to design and manufacture all products in the UK, thanks to its world-class production facilities.

LEITSPEED

Stand: 5032

Stand Representatives: Steffen Leitgeb

Address: Siemenstr 10, Bad Friedrichshall, 74177, Germany

Tel: +49 170 272 09 54

Email: info@leitspeed.de

Web: www.leitspeed.de

Leitspeed is the main distributor for Racelogic VBOX motorsport products in Germany, Austria and Switzerland. These markets are supported by Leitspeed with exclusive German manuals and an upgraded German product service. Some of the video loggers get custom-tailored packaging to meet higher quality demands. Video loggers sold and supported by Leitspeed are widely used in various race series, including Adac GT Masters, VLN and 24H race series, Blancpain Trophy, RallyCross, Porsche Sports Cup and various historic races. Visit the stand for further information on VBOX Motorsports products. Take home one of its German brochures, and learn how to improve your speed and your lap times at www.leitspeed.de.

LENTUS COMPOSITES LTD

Stand: 3052

Stand Representatives: Patrick Li

Address: 9/10B Station Point, Old Station Way, Eynsham, OX29 4TL, Oxon, UK

Tel: +44 1865 592 240

Fax: +44 1865 592 241

Email: info@lentuscomposites.co.uk

Web: www.lentuscomposites.co.uk

Lentus Composites designs and manufactures products with a range of manufacturing technologies including autoclave/pre-preg, RTM and resin infusion, as well as being experts in the field of filament winding. The main product areas include panels, chassis parts, enclosures and structures, propshafts and couplings, accumulators/pressure vessels, containment sleeves for motor/generators, and energy storage flywheels. Manufacturing is controlled under ISO 9001:2008 systems and processes. Inspection and mechanical testing facilities allow for product validation and qualification and physical characterisation of the composite, NDT and dimensional inspection. Lentus can deliver a comprehensive service, from component design to pattern and tooling manufacture through to a fully inspected part, within a matter of days.

LIFE RACING LTD

Stand: 2026

Stand Representatives: Jason English

Address: 6 Repton Close, Basildon, SS13 1LE, Essex, UK

Tel: +44 1268 274 421

Fax: +44 1268 274 422

Email: info@liferacing.com

Web: www.liferacing.com

Life Racing provides electronic control solutions for motorsport from LMP1 to single-make series, automotive OEMs and military applications. Direct injection, standalone or integrated paddle-shift systems, drive-by-wire, intelligent power distribution, electronic fusing, and the high-reliability wiring systems required for the most demanding applications. The company has extensive experience of knock-limited, fuel flow-limited, intake-restricted turbocharger control gained over years of support, where it has multiple class and series wins in conjunction with race engine development companies.

LIFELINE FIRE & SAFETY SYSTEMS

Stand: 1031

Stand Representatives: Jim Morris

Address: Falkland Close, Coventry, CV4 8AU, UK

Tel: +44 2476 712 999

Fax: +44 2476 421 322

Web: mclaren.com/appliedtechnologies

McLaren's expertise is rooted in five decades of success on the track – a heritage that stretches back to 1963, when Bruce McLaren fulfilled his dream of starting a Formula 1 team. Global motorsport relies on McLaren Applied Technologies' high-performance electronics, components and software to continue to set new standards across the industry. The company

supplies the standard electronic control systems used in IndyCar, Nascar and Formula 1, taking pride in developing products that are innovative, robust and utterly reliable. Its equipment is favoured by teams and engine manufacturers in all disciplines of motorsport. Its systems are known to be reliable and high performance, while also offering the high levels of safety and security demanded by McLaren's uncompromising customers.

MEGA-LINE RACING ELECTRONIC GMBH

Stand: 3058

Stand Representatives: Michael Bleile, Benedikt Roos

Address: Haunersdorfer Str 3, Saal (Donau), 93342, Germany

Tel: +49 9441 6866 0

Fax: +49 9441 6866 11

Email: info@mega-line.de

Web: www.mega-line.de

Mega-Line Racing Electronic is a specialist in electric and pneumatic paddle-shift systems, as well as various other actuation and control applications. For years the company has been well known for the highest quality, reliability and performance in factory and private motorsports. Its product portfolio covers all necessary components of assisted gearshift systems, both electric and pneumatic. It also provides state-of-the-art electric systems such as its e-clutch actuator and the brand-new wiper control unit, which provides sufficient torque at constant wipe-rpm for perfect sight, even at enhanced car speeds. Mega-Line also represents leading innovation as a preferred development partner for pneumatic and electric actuation and control systems.

MEI FUNG INTERNATIONAL

Web: www.motordrive.com

Motordrive manufactures FIA-homologated competition seats. In the company's 30-year history, the owners have focused on safety, style and comfort, without compromise. Motordrive seats are built in the UK with attention to detail and bespoke finishes. Motordrive supplies direct to the public and also to race/rally teams. Innovation is key, and the business is proud of its latest developments, which include newly homologated winged seats and coloured shells. Motordrive is a UK market leader in lightweight, affordable, quality carbon seats, and is keen to develop a wider distributor network in Europe and beyond. While staying true to its heritage, the business is being driven forward in the way you would expect from a privately owned British firm with a lot of pride and a big presence in the UK market. Motordrive is now looking to expand into the world market for competition seating.

PYROMERAL SYSTEMS SA

Stand: 6060

Stand Representatives: Guillaume Jandin

Address: 13 Rue D'Ognon, Barbery, F-60810, France

Tel: +33 344 72 34 77

Email: guillaume.jandin@pyromeral.com

Pyromeral Systems is a leader in high-temperature composites for applications up to 1,000°C. With its expertise in high-temperature matrices and its use in composite manufacturing, the company makes parts that not only offer the light weight of conventional carbon-fibre composites, but also combine good structural properties and resistance to temperatures that far exceeds that of polymeric composites. Already established as a reliable solution to managing extreme heat in motorsport applications, Pyromeral Systems' materials are ideal for improving the lifetime and performance of heat shields and fire barriers, or for considerably reducing the weight of components exposed to high temperatures, including exhaust systems.

QSP PRODUCTS

Stand: 1026

Stand Representatives: Ferdi Biesheuvel

Address: Schutweg 25, Waalwijk, 5145 NP, Netherlands

Tel: +31 416 348 996

Email: info@qspproducts.com

QSP Products is a professional supplier for various markets. It produces all kinds of racing equipment, including harnesses, fuel and oil fittings and hoses, turbo components, cooling components, insulation products, interior products and more.

QUENTOR LIMITED

Stand: 4042

Stand Representatives: Andy Picking, Kate Asbury, Gavin Stagg, Jack Atkinson

Address: Unit 10 Fitzmaurice Court, Rackheath Industrial Estate, Norwich, NR13 6PY, UK

Tel: +44 1603 721 604

Fax: +44 1603 721 992

Email: andy@quentor.com

Web: www.quentor.com

Founded in 1972, Quentor has a long and distinguished history in the design and manufacture of high-quality bespoke seamless garage walling systems, flight cases, storage equipment and freight solutions for the international motorsport industry. It strives to exceed expectation through unparalleled levels of customer service and support, continual product development and leading technical innovation. Quentor's trademark lightweight honeycomb panel solutions substantiate its position at the forefront of technology for this market. It supplies all F1 teams, a host of top teams in the World Endurance Championship, ELMS, GT Racing, Formula E Series and most other high-end global motorsport series.

RACE ENGINE TECHNOLOGY

Stand: 5040

Stand Representatives: Frankie Robins, Brett Sheppard, Sarah Wakelam, Stewart Mitchell, Ian Bamsey

Address: Whitfield House, Cheddar Road, Wedmore, BS28 4EJ, Somerset, UK

Tel: +44 1934 713 957

Fax: +44 208 497 2102

Email: chris@highpowermedia.com

Web: www.highpowermedia.com

Race Engine Technology magazine has established itself as the communications hub of the racing powertrain world. Its incisive analysis reveals secrets

of performance. Edited by Ian Bamsey and his team of the best motorsport journalists, engineers and professors, the magazine contains in-depth research insights probing significant contemporary race engine projects. The company also publishes the Race Technology Reports series of magazines covering all the technical engineering aspects of F1, Le Mans, Drag Racing, Nascar, rallying and alternative power, with a unique publication devoted to each discipline.

RACE TECH MAGAZINE

Stand: 4030

Stand Representatives: Soheila Kimberley, William Kimberley, Mike Norman, Adrian Goodsell

STK Turbo Technik's core skills includes the matching, manufacturing and distribution of motorsport and upgrade turbochargers. It also makes small-batch, pre- and special series for reputable vehicle manufacturers, and offers R&D service for OEMs and OES customers. Its experience in turbocharging has led to STK Turbo Technik being appointed by Garrett/Honeywell as the only authorised Garrett performance distributor for motorsport turbochargers in Germany. It is also a SETAB IC distributor.

SÜDSTRAHL GMBH & CO KG

Stand: 8055

Address: Max-Eyth-Str 6, Tamm, D - 71732, Germany

Tel: +49 7141 299 21 45

Fax: +49 7141 299 2141

Email: m.wutschik@suedstrahl.de

Web: www.suedstrahl.de

SÜDSTRAHL offers a complete and comprehensive range of Dry Ice Blasting machines. Dry ice-blasting is a cleaning process, where dry ice pellets of carbon dioxide, are crushed and accelerated in a pressurized air stream and directed at a surface in order to clean it. The method is similar to other forms of abrasive blasting such as sand blasting, plastic bead blasting, or soda blasting BUT substitutes dry ice as the blasting medium. SÜDSTRAHL range of Dry Ice Blasters offer the opportunity to clean dirt and grime from all parts of any vehicle or automotive part, from oil on engines to dirt in electronics without damage to paintwork or components. SÜDSTRAHL also seeks distributors throughout Europe and offers O.E.M. manufacturing for those who wish to promote "own brand".

SUPERFLOW

Stand: 7066

Stand Representatives: Scott Giles, Ed Collier, Peter Neyens, Mike Giles, Scott Kriskowski

Address: 4747 Centennial Blvd, Colorado Springs, 80919, Colorado, USA

Tel: +1 719 471 1746

Fax: +1 515 254 1656

Email: info@superflow.com

Web: www.superflow.com

SuperFlow's industry-leading line of chassis and engine dynamometers and air flow test benches will be on display at the 2015 expo. With the only truly mechanically synchronised chassis dynos available, SuperFlow's all-wheel-drive chassis dynos are a must for any serious chip tuner. In addition, SuperFlow's line of engine dynamometers continues to be the standard for top engine builders across all forms of motorsport. Since inventing the first production airflow bench in the 1970s, SuperFlow has gone on to develop a line of flow benches to meet any flow testing requirements.

SURF & TURF INSTANT SHELTERS

Stand: 1018

Stand Representatives: Simon Lunt

Address: 40 Moss Side Lane, Rixon, Warrington, WA56 6HJ, Cheshire, UK

Tel: +44 1925 819 608

Fax: +44 161 7762820

Email: info@surfturf.co.uk

With a large range of instant shelters, new and improved this year, Surf & Turf Instant Shelters has a grade and size to suit all. At all levels of motorsport, promotion is vital. Surf & Turf Instant Shelters' printing and branding department can offer a highly visible marketing tool whenever your shelter is erected, from a simple logo to a full flood print. Also available are feather and teardrop flags in various sizes and banners; these are very popular with circuit owners. Surf & Turf Instant Shelters will also show its exciting range of paddock solutions, flight cases, flooring, logo rubber-backed paddock mats (power washable), and its very popular paddock workbench, which folds flat for easy transportation.

T-TOOL PRECISION GMBH

Stand: 2008

TE Connectivity (TE) Deutsch Autosport connectors and Raychem heat-shrinkable moulded products and harness components are market leaders in autosport interconnection solutions specified by leading teams across the entire autosport industry, from Formula 1, Indycar, Nascar, World Rally teams, to Moto GP and Superbikes. TE's Deutsch connectors and Raychem harness components are designed and manufactured to withstand the harsh conditions found in the competitive motorsport arena. Global technology support and distribution are positioned to supply quality products for the right application anywhere in the world, including all aspects of sensing, datalogging, power management and KERS solutions used worldwide.

TEAM DYNAMICS MOTORSPORT

Stand: 4036

Stand Representatives: Mark Wain, Marcel Valdez

Address: Rimstock Plc, Church Lane, West Bromwich, B71 1BY, West Midlands, UK

Tel: +44 121 525 2525

Fax: +44 121 553 1083

Email: mattneal@rimstock.com

Rimstock is the UK's largest and most advanced alloy wheel manufacturer and home of the famous Team Dynamics brand. Supplying competition wheels in high-level competition around the globe, from the bruising world of British Touring Cars all the way to Australia's V8 Supercars and World Touring Cars, Rimstock provides the highest-quality cast and forged alloy wheels for the Touring Car, GT Sports Prototype racing and Formula categories. It can provide solutions for complete championships, race car constructors or individual teams looking for high-quality solutions at all levels of the motorsport industry.

TECNO2 SRL / A.I. TECH. / TEKNOFIBRA

Stand: 3000

Stand Representatives: Ercole Marco, Bayma Renzo, Nicoletti Paolo

Address: Strada Del Cascinotto 139/43, Torino, I-10156, Italy

Tel: +39 011 822 4969

Fax: +39 011 822 5073

Email: m.ercole@tecno2.it

Web: www.aitechitaly.com

Advanced Innovation Technology (A.I. Tech) is dedicated to the pursuit and development of new motorsport techniques. Today the design team spends considerable time contracted to manufacturers of prototype, studio and dream cars as well as supplying AE equipment to vehicle manufacturers around Europe. A.I. Tech now has an expanded range of steering wheel quick-release bosses. Many hundreds are sold under major brand names (unable to quote due to confidentiality contract clauses). Then there is the company's ever-expanding range of wheel studs and nuts. This product range, for over 25 years the core of the company, now offers around 150 applications.

Computer-aided design and CNC production facilities ensure the highest efficiency and quality standards.

TENNANT METALL & TECHNOLOGIE GMBH

Stand: 6004

Stand Representatives: Barry Tennant, Martin Boemke, Diana Debert, Leonie Tennant, Birthe Klose

Address: Castroper Str. 80, Herne, D-44628, Germany

Tel: +49 232 318 429

Fax: +49 232 318 427

Web: www.titanmotorsports.com

Titan Motorsports is a performance parts distributor based in Orlando, FL. From its base in the USA, it distributes over 200 brands, and services clients all over the world. It is dedicated to providing the highest-quality performance parts at affordable prices, regardless of the make or model of your vehicle. Titan Motorsports is a full-service tuning company offering retail, wholesale, installation, tuning and racing services for the automotive performance industry.

TOA & ARAI

Stand: 6054

Stand Representatives: Yuichiro Suzuki

Address: 688-1 Toyoda, Kawagoe-cho, 510-8122, Mie, Japan

Tel: +81 80 3633 5533

Email: y-suzuki@taforging.co.jp

Web: www.toa-arai.com/en/

Toa & Arai forges not just iron but solutions for added-value products by value engineering (VE). For example, its hollow valve manufactured by its VE has resulted in greater cost reduction and significant functional improvement in engines. Also, its mirror blanking machine-less precision forging technology has succeeded in realising better quality and functionality than conventional blanking, while reducing process, time, yield rate and cost. Toa & Arai believes that its strength is to offer customers solutions for value-added products by its VE, through eliciting the dormant potential of customers' products.

TOORACE

Stand: 8030

Stand Representatives: Valter Casa

TRACTIVE AB

Stand: 5066

Address: Gjutargatan 54, Borlange, 78170, Sweden

Tel: +46 243 22 11 55

Fax: +46 243 22 11 80

Email: kristoffer.johnsen@tractive.se

Tractive is an innovative manufacturer of high performance, high durability transmissions and differentials for the racing industry. Tractive's track record includes a leading manufacturer role in the demanding industry of concrete cutting. Tractive has proved able to keep ahead of the competition in a highly demanding market place and is now gearing up to become a real presence in racing transmissions again. Tractive's deep understanding

of high precision manufacturing, a highly innovative culture and the spirit of a family company combines in a force that will have to be reckoned with in the racing industry in days to come.

TREMONDI S.R.O.

Stand: 1034

Stand Representatives: Petr Balcarek

Address: Bucovska 417, Letonice, 68335, Czech Republic

Tel: +420 606 326 923

Email: petr.balcarek@tremondi.cz

Web: www.tremondi.cz

Tremondi is an engineering company focused on electronic systems for racing cars. Under the Tremondi brand it offers products for car body electronic systems developed through its own R&D activities, together with engine control units made either by Magneti Marelli Motorsport or by Bosch Motorsport, and wiring harnesses of its own production. It is able to supply complete car electronic installation 'from nose to tail'. If required, it can provide technical support on all its electronic products. In addition to electronics, Tremondi offers high-performance extra lighting units for racing purposes – these are particularly suitable for rallies and endurance races. The company is also developing an intelligent extra lighting system based on the newest OEM LED technology. Tremondi philosophy is to provide state-of-the-art solutions at reasonable cost, implementing its innovative design with the best-possible efficiency.

Web: www.viperperformance.co.uk

Viper Performance Hoses is a manufacturer and stockist of a very extensive range of silicone hoses and aluminium pipes of the highest quality, together with silicone extrusion and mouldings products. It provides solutions for race teams, marine, military, trucks, buses, bikes, agricultural, pharmaceutical, machinery, plant, commercial vehicles, the rail industry, and more. Viper Performance Hoses is known for unrivalled quality and customer service. In addition to the large stocks it carries for immediate delivery, it works with customers to provide bespoke solutions and products at low volumes and with realistic lead times. The company offers a personalised service.

VIRAVER TECHNOLOGY SRL

Stand: 2012

Stand Representatives: Guido Schippa, Massimo Pilon

Address: Via Dell' Artigianato 8, San Pietro Viminario - PD, I-35020, Italy

Tel: +39 042 976 0132

Fax: +39 042 971 9723

Email: sales@viraver.com

Viraver is a world leader in the production of glazing for the transportation industry. Based in Italy, Viraver specialises in the design and manufacturing of composite windscreens, glass and polycarbonate windows set for show cars, prototypes and racing cars. Thanks to its expertise, Viraver offers lightweight transparent panels providing the maximum protection and optical quality, perfectly integrated in the design of the car. Viraver technology includes weight reductions of up to 50%, increased scratch resistance, micro-wired heating elements, infrared protection, and side windows with sliding doors (patented).

WAVETRAC DIFFERENTIALS

Stand: 6038

Stand Representatives: Dana Clark, Rafael Santiago

Address: Autotechdriveline, 29 Journey, Aliso Viejo, 92656-3333, CA, USA

Tel: +1 949 362 8700 x25

Fax: +1 949 362 8720

Email: dclark@wavetrac.net

Web: www.wavetrac.net

The Wavetrac is the only torque biasing differential on the market with patented technology that maintains drive when an unloaded wheel condition arises. The Wavetrac outperforms other gear type differentials because, unlike them, it won't lose drive when one axle is unloaded (which happens more often than you'd think). Wavetrac is a state-of-the-art helical gear differential designed, developed and manufactured in the USA by Autotech Driveline. One of the most underrated benefits of the Wavetrac is its smooth delivery of power near the limit. The Wavetrac makes you faster because it lets you drive with confidence.

WEIGHTWORKS GMBH

Stand: 5027

Address: Kaltbrunnerstr. 24, Allensbach, D-78476, Germany

Welcome to Xceldyne Technologies and Xceldyne Europe, a direct manufacturer of titanium and stainless-steel valves and valvetrain components. For many years, Xceldyne has ambitiously sought and successfully met the high demands of motorsports professionals worldwide. Its dedication to R&D, engineering and manufacturing has pioneered and set new standards for quality control, consistent performance and durability of racing valvetrain systems. Welcome to PSI, an industry leader since it was established in 1996. PSI (Performance Springs Inc) has worked continuously to expand its range of specialised valve spring applications. Currently offering springs for circle track, drag and road racing, PSI springs also feature heat treating, nitriding and the new Max Life surface preparation process for various applications.

XTRAC
